

# Assignment

Some ideas

(Notes)

- Uniqueness only has to be  
for each class

Searching

input (student id, name, flag)

private  
key

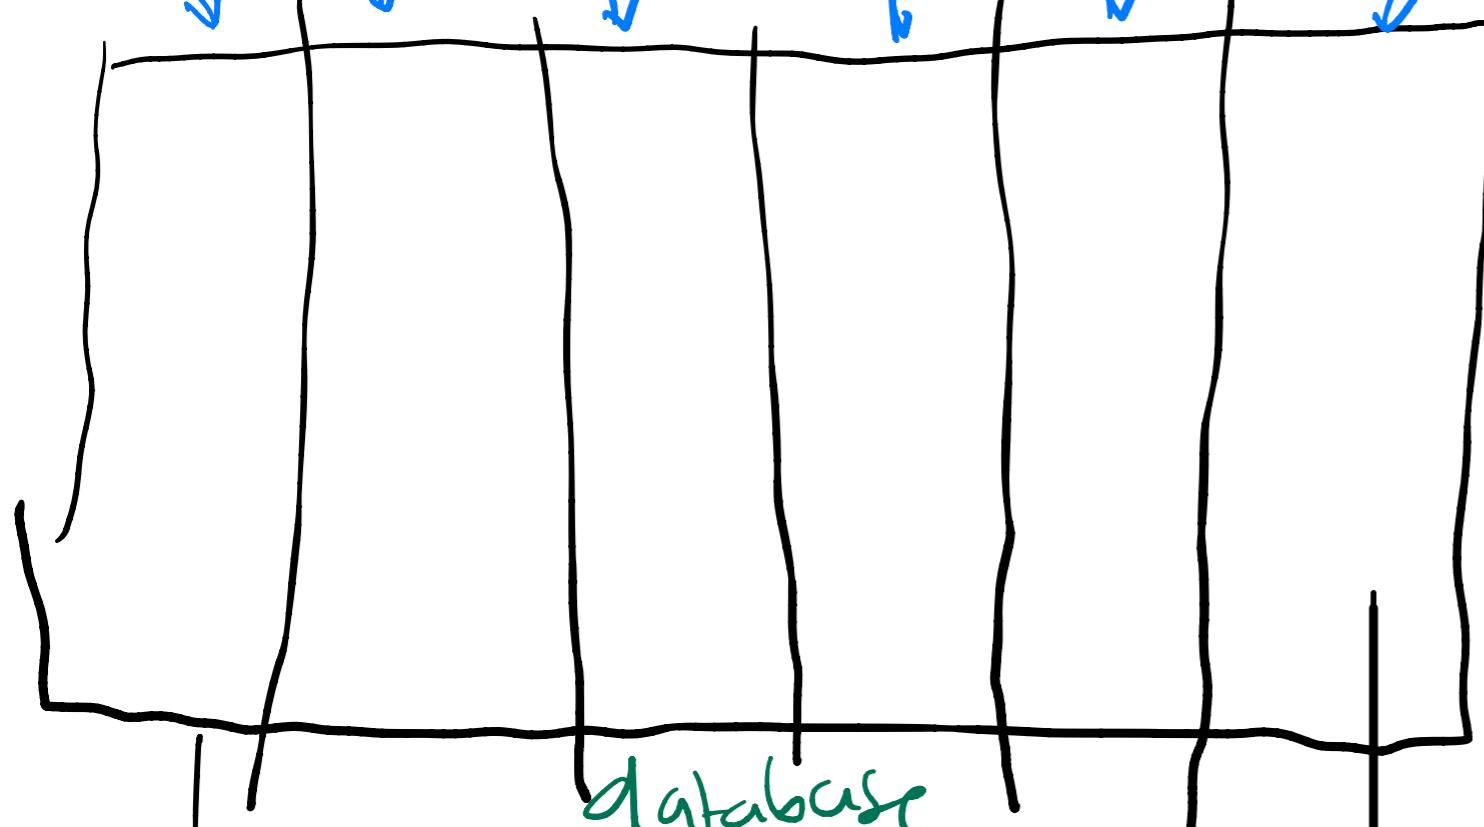

St-ID

First

Middle

Last Name

country id

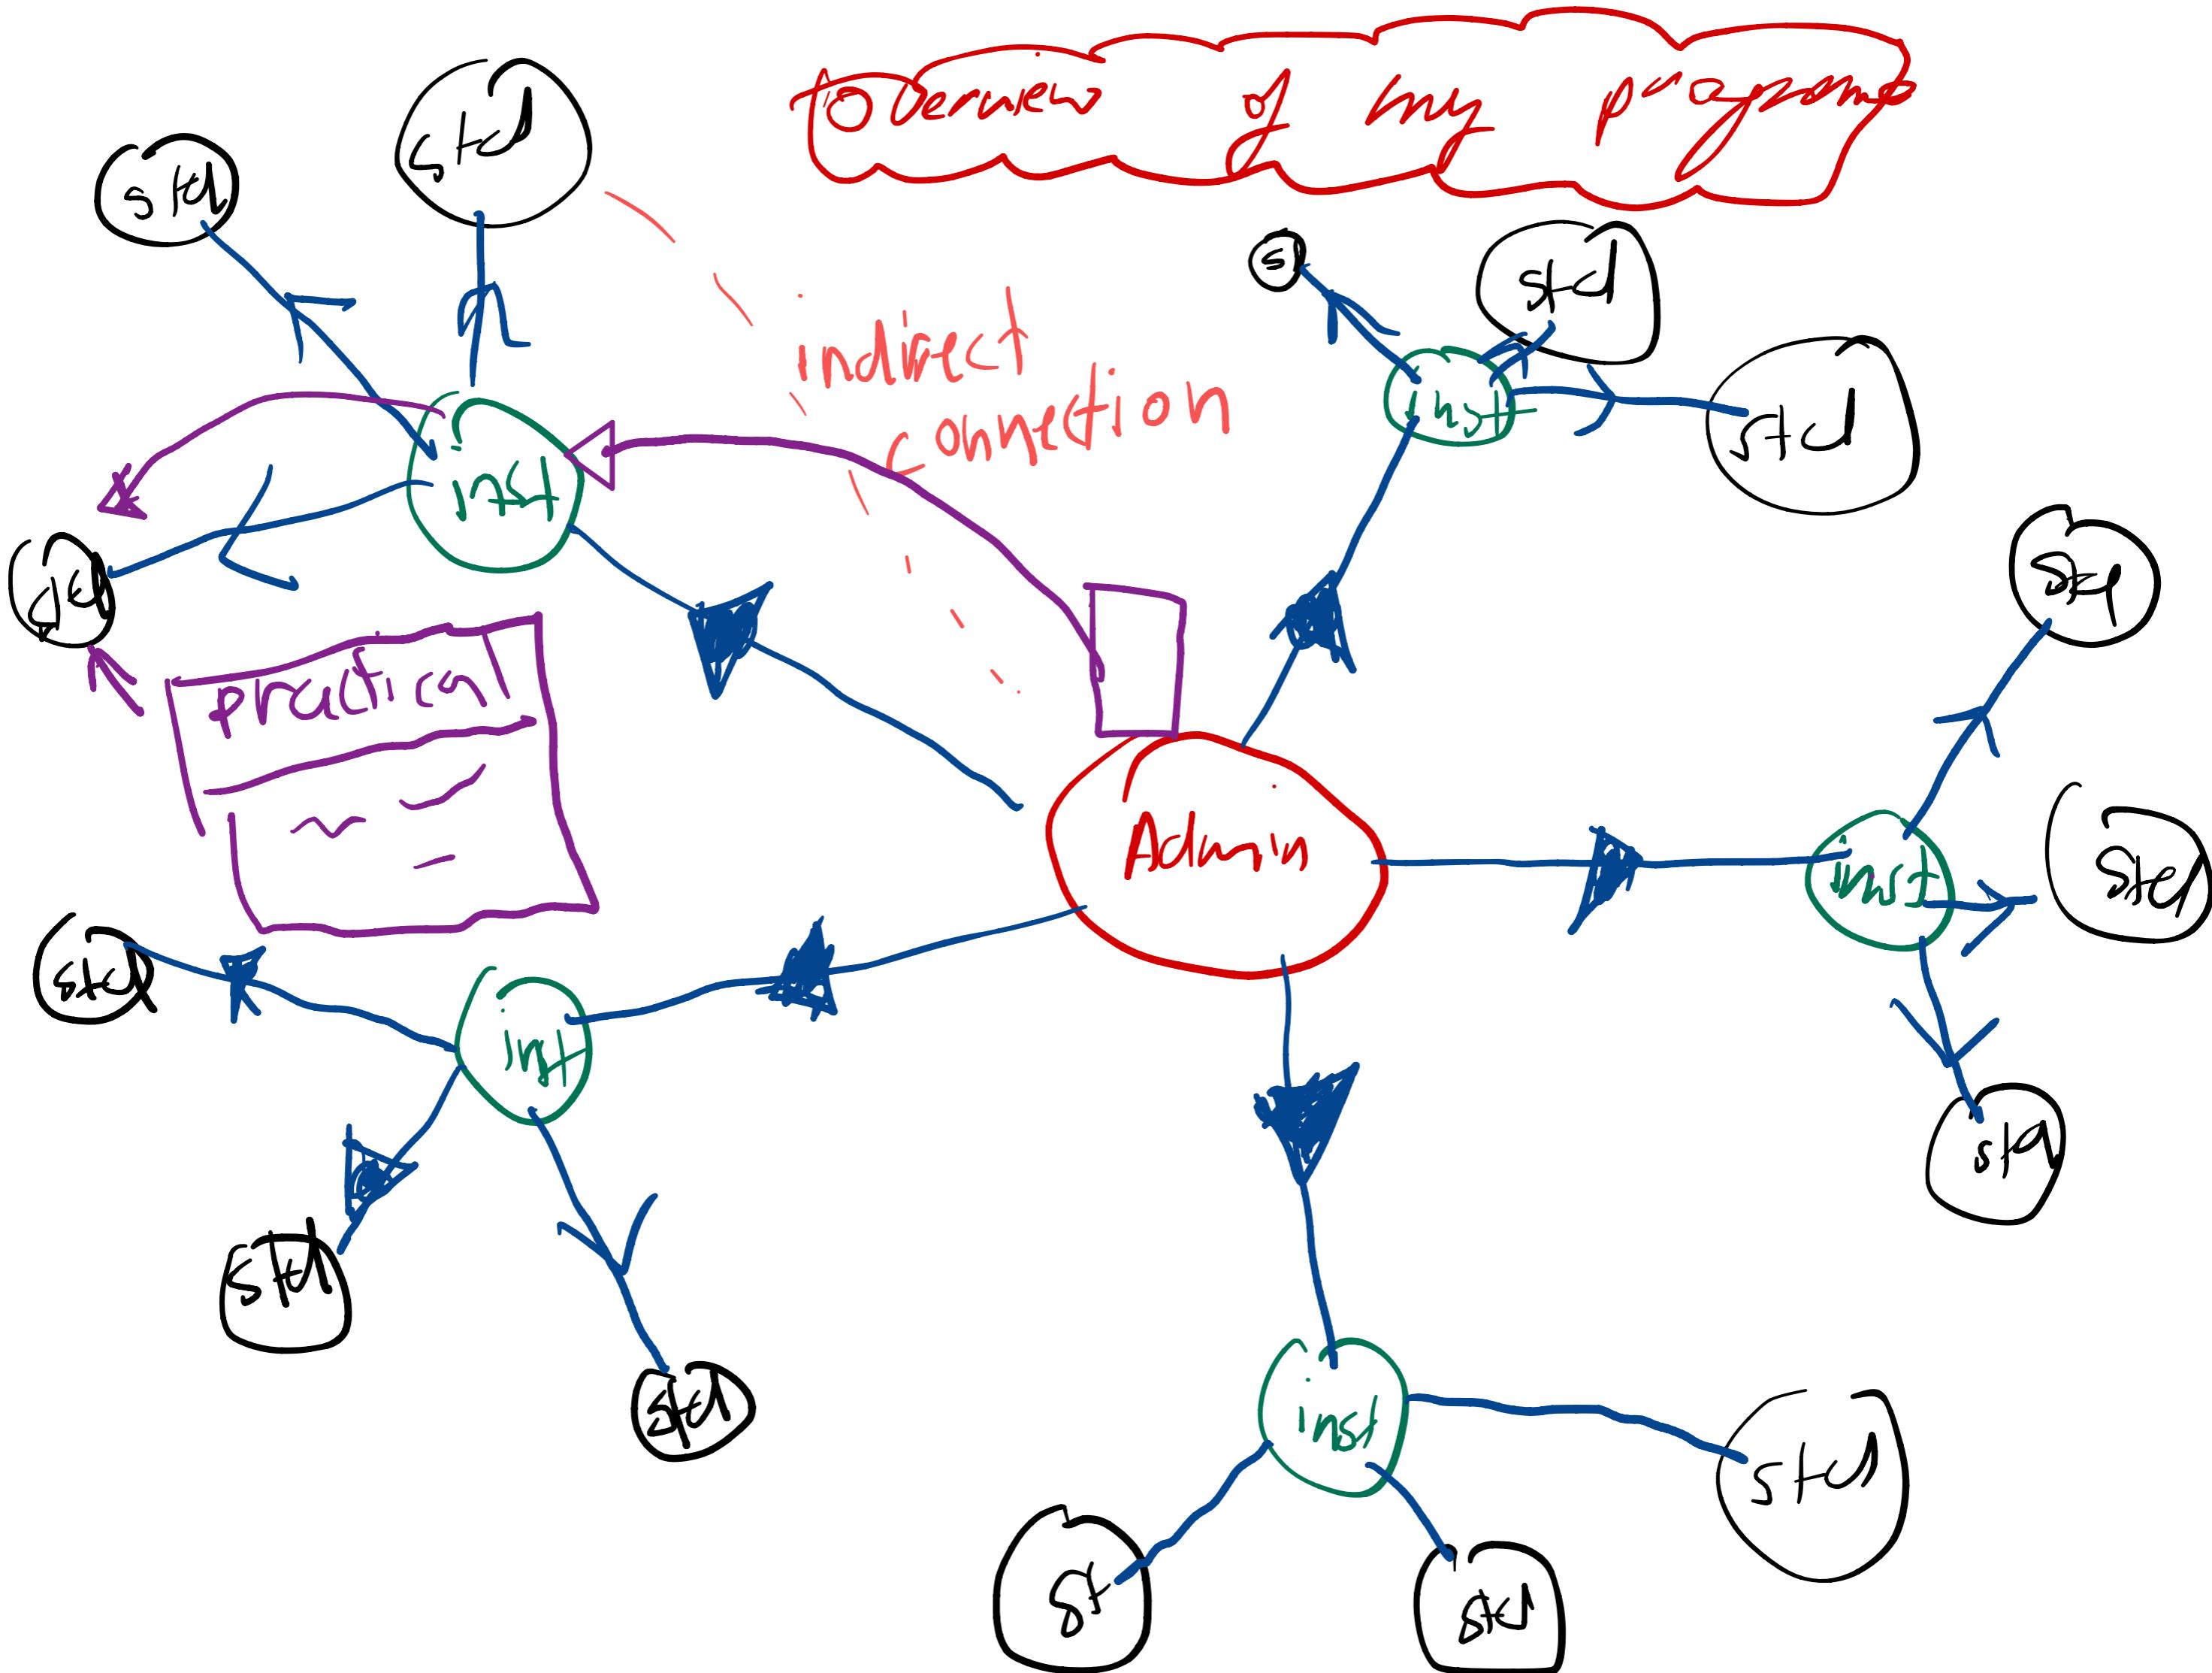

Find id corresponding  
to search

Search within  
objects

Every user will have  
a unique id. Therefore,  
allowing to store users  
with the same  
first name.

User input

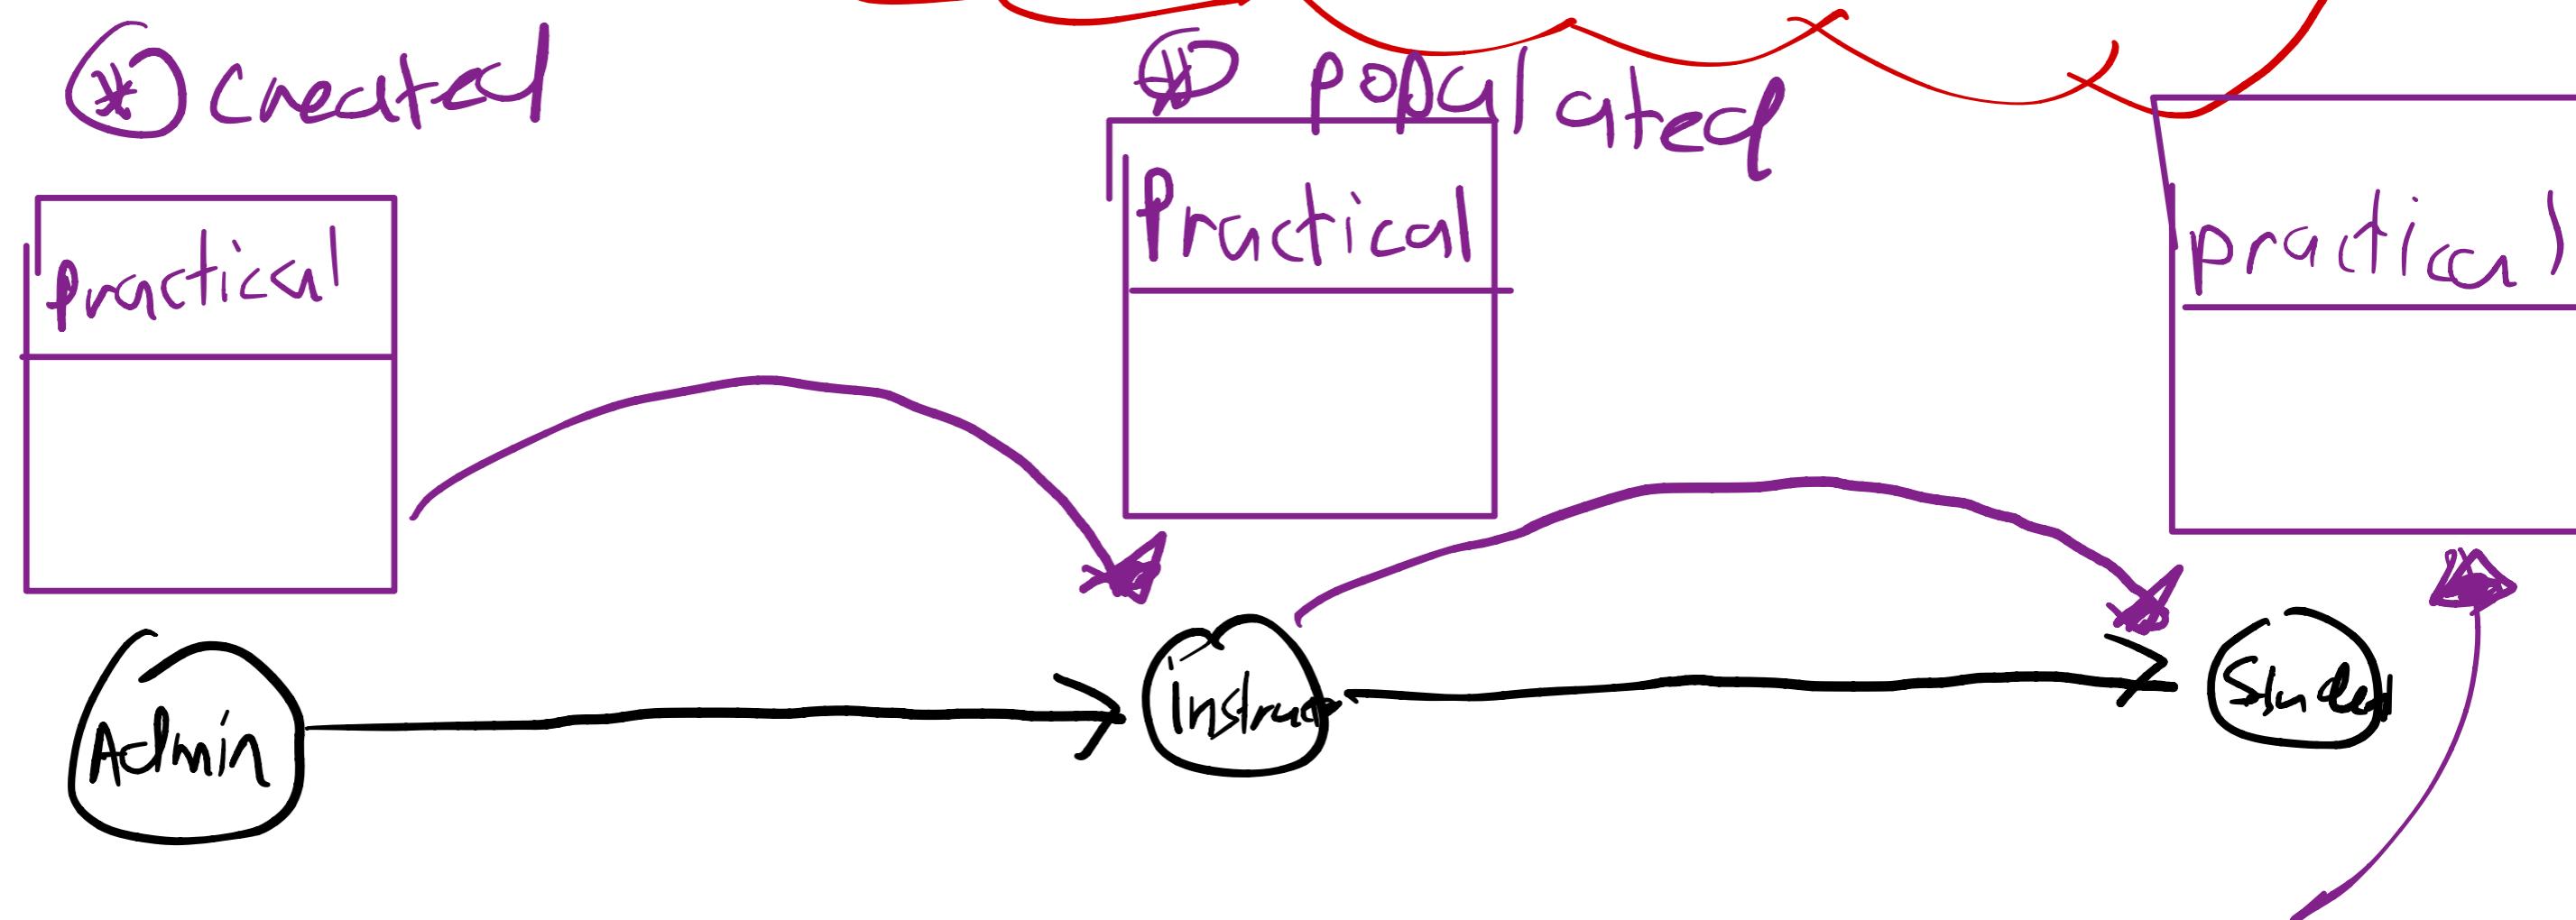

result

\* Can only access the thing  
you've connected to, or  
the indirect connections which  
you have

\* Only access information direction  
of graph

Flow of information

\* can  
only view  
the practical

1 9 4 7 6 7 0 0

1 2 3 4 5 6 7 8

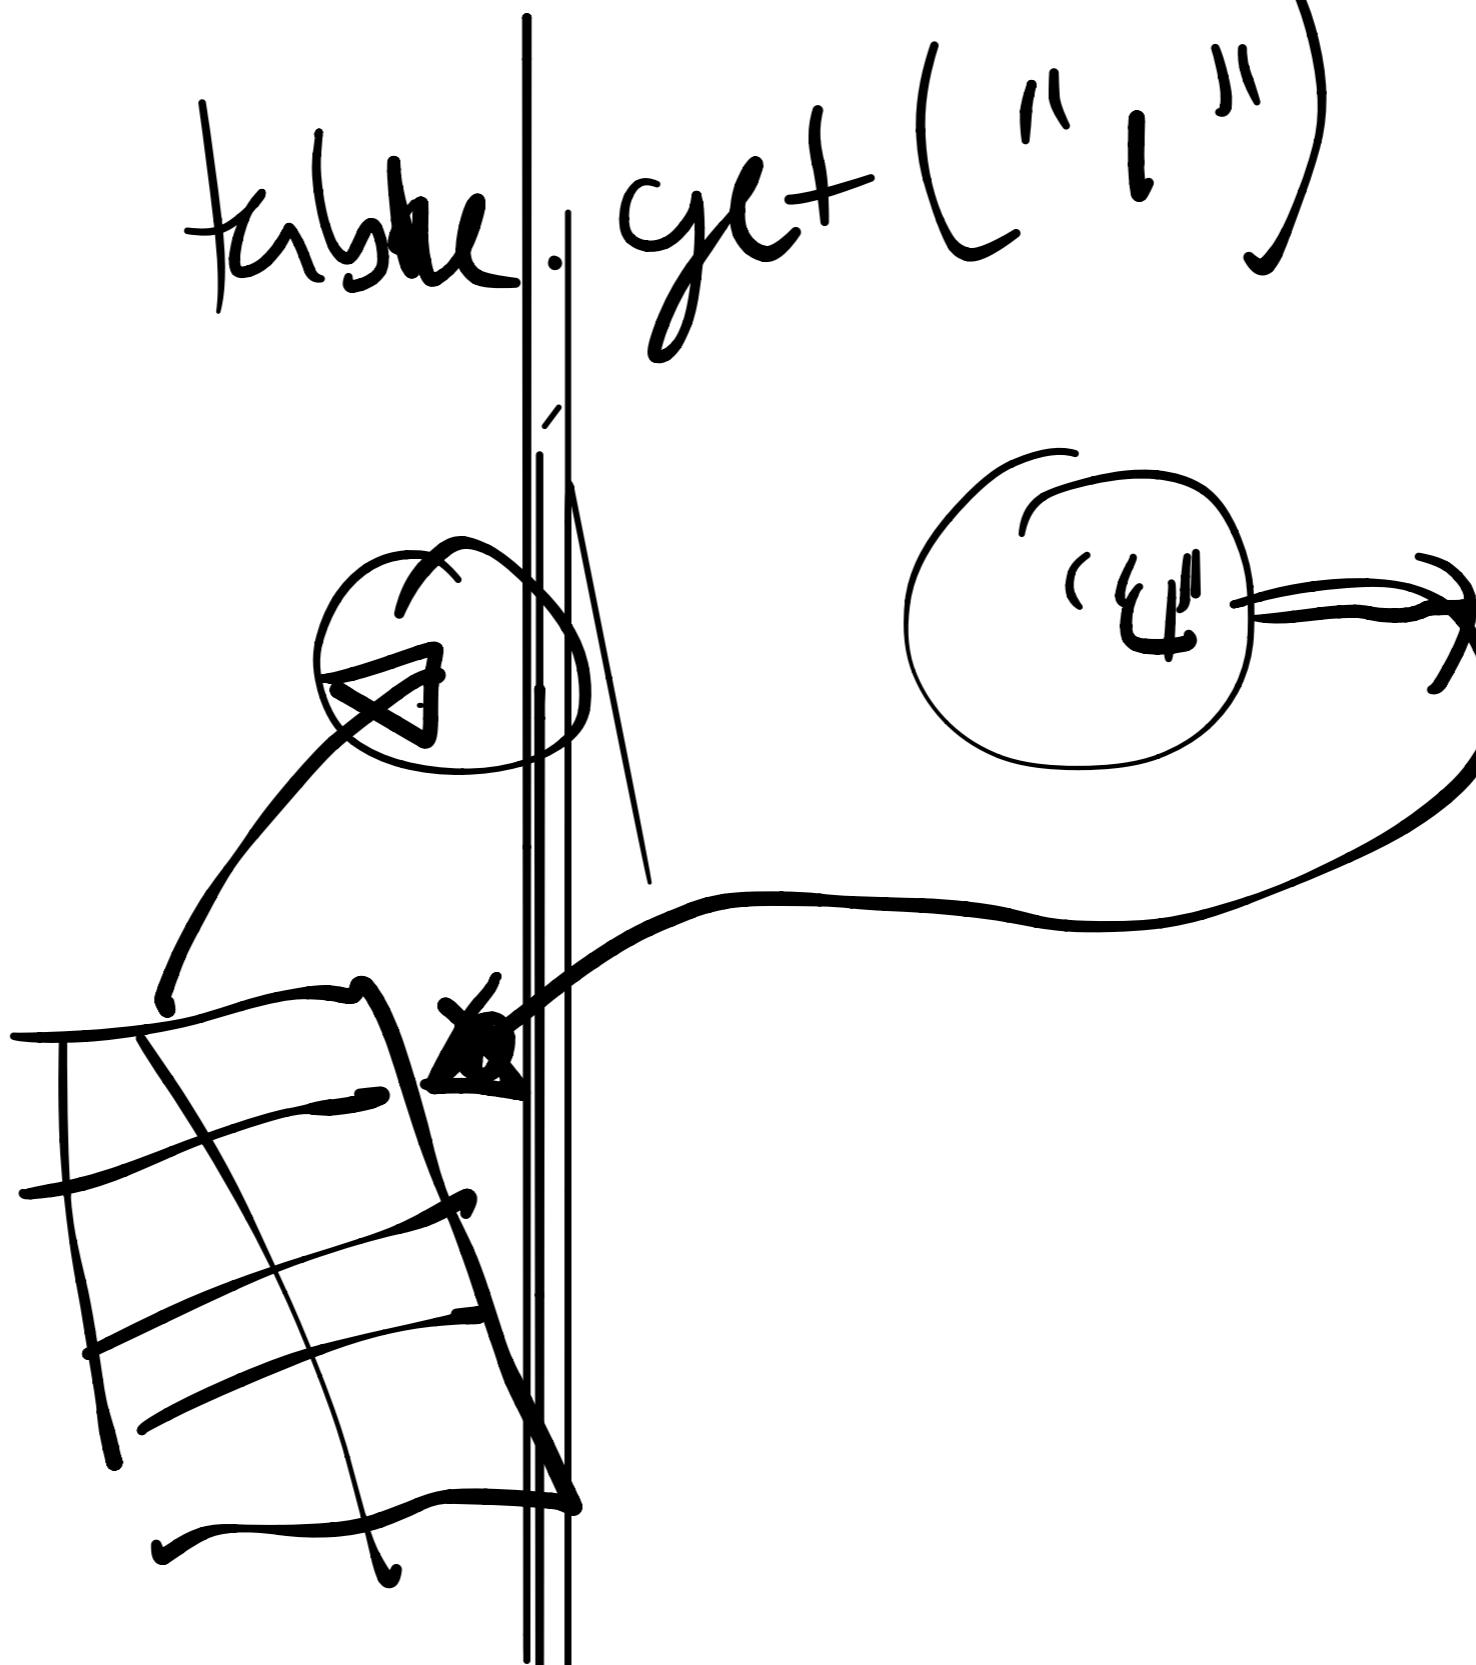

2 8 3 6 9 6 A

1 2 3 4 5 6 ↑

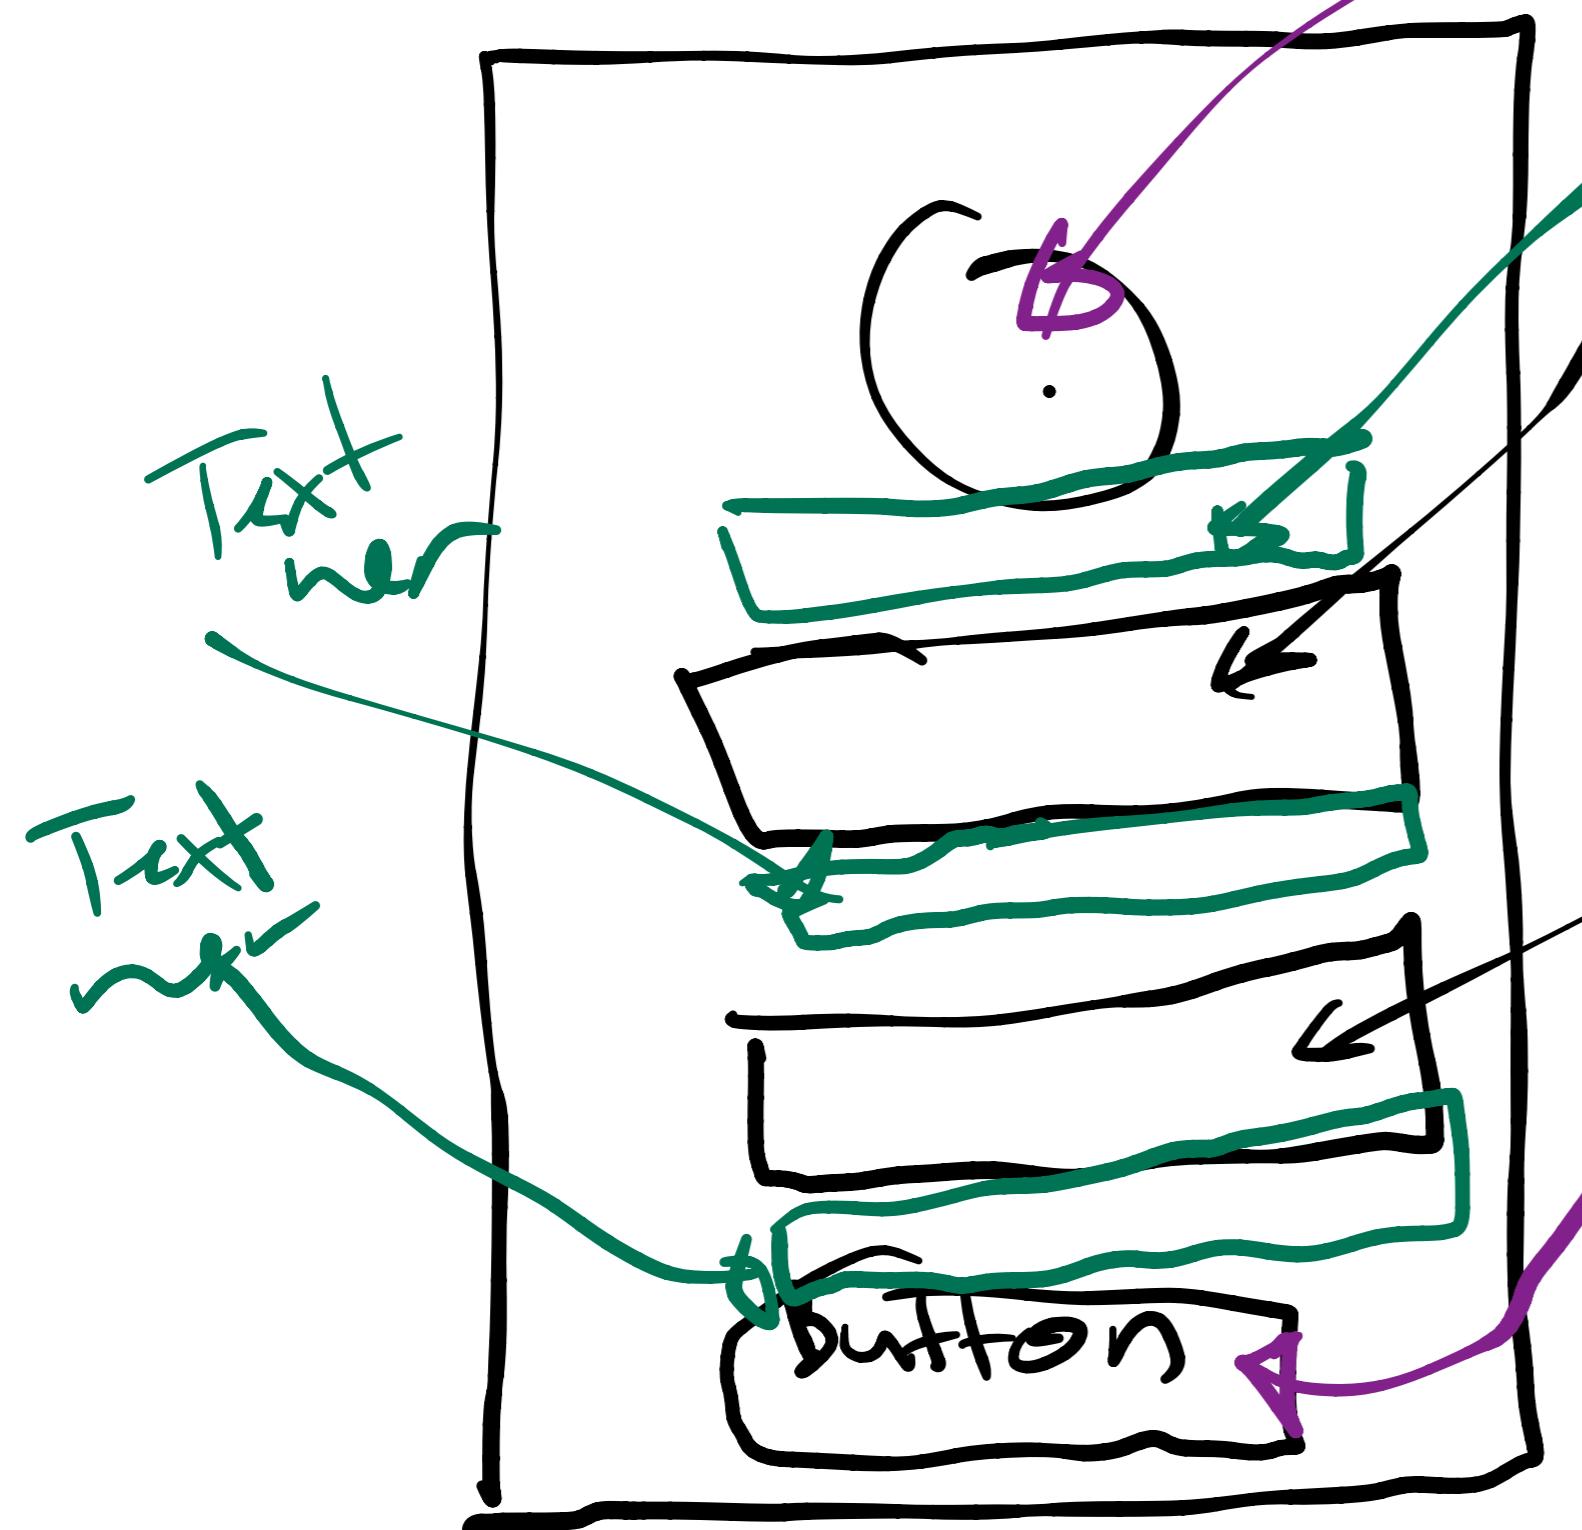

Letter.

Key	Value
"1"	G
"2"	O
"3"	O
"4"	O
"5"	O
"6"	O

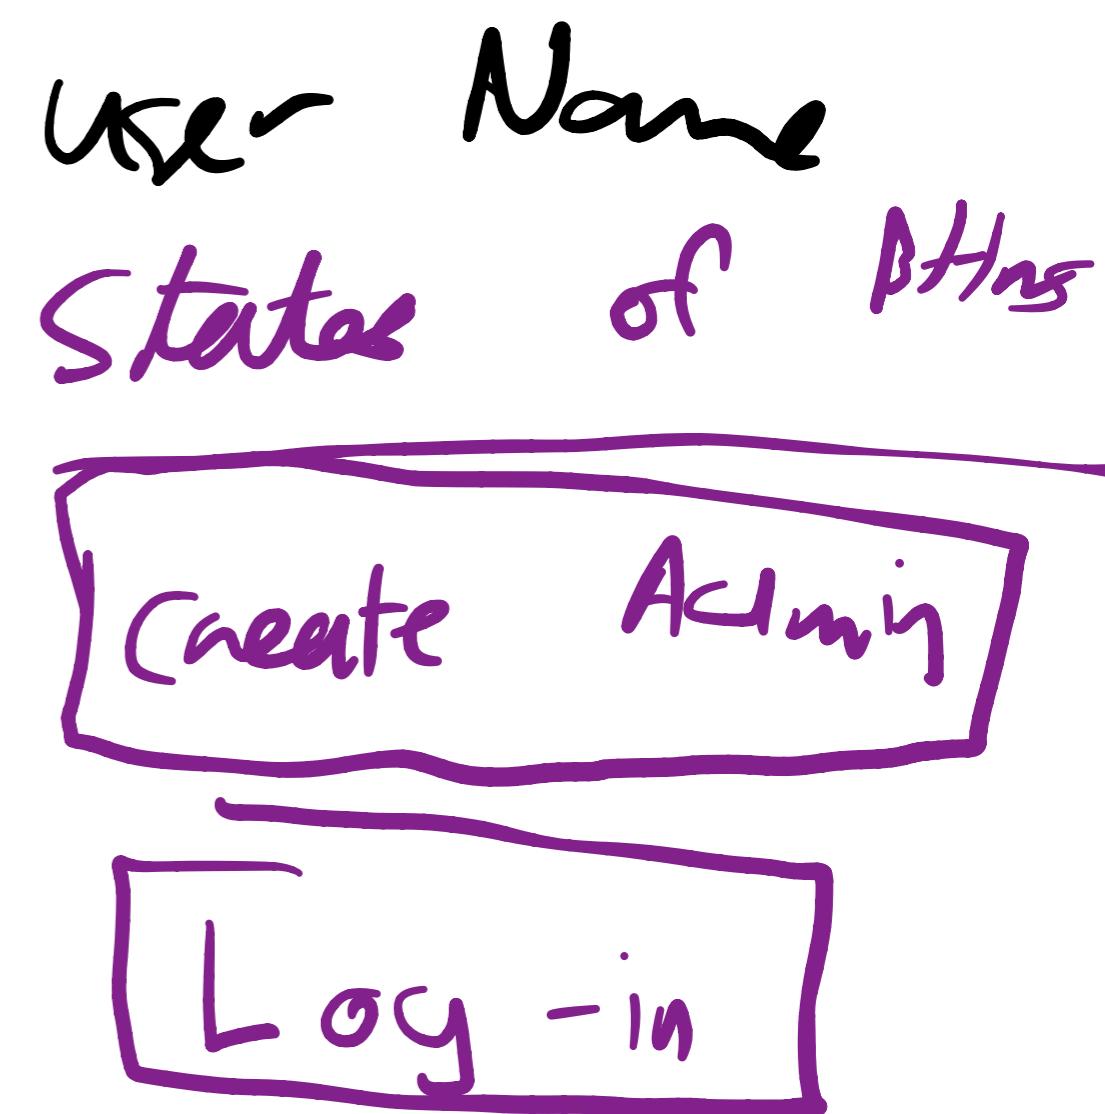

"1" → "4"  
 table.get("1")
